Participatory Culture

Henry Jenkins:

1. With relatively low barriers to artistic expression and civic engagement
2. With strong support for creating and sharing one’s creations with others
3. With some type of informal mentorship whereby what is known by the most experienced is passed along to novices
4. Where members believe that their contributions matter
5. Where members feel some degree of social connection with one another (at the least they care what other people think about what they have created)\(^5\)

Interpretive Community

Stanley Fish:

"Interpretive communities are made up of those who share interpretive strategies not for reading (in the conventional sense) but for writing texts, for constituting their properties and assigning their intentions. In other words, these strategies exist prior to the act of reading and therefore determine the shape of what is read rather that, as is usually assumed, the other way around."\(^6\)

\(^6\)Fish 1980, p. 171.
Jean-Paul Sartre:

"Since the order of truths exists outside of me, that which will define me as an autonomy is not creative invention but refusal. It is by refusing to the point of being unable to refuse any more that we are free."\(^7\)

Zetetic Astronomy. Earth not a Globe! An Experimental Inquiry into the True Figure of the Earth: Proving it a Plane, without Axial or Orbital Motion; and the only Material World in the Universe! By Parallax, London 1965.
"The term "zetetic" is derived from the Greek verb zeteo; which means to search or examine — to proceed only by inquiry. None can doubt that by making special experiments and collecting manifest and undeniable facts, arranging them in logical order, and observing what is naturally and fairly deducible, the result will be far more consistent and satisfactory than by framing a theory or system and assuming the existence of causes for which there is no direct evidence, and which can only be admitted "for the sake of argument"."\(^8\)

• "group of researchers"

"Our Group "Earth – Flat" is a site for flat-earthers and for those, who are sincerely interested in the topic and want to expand their knowledge on various aspects of our flat and stationary Earth, and share their insights, observations and questions"\(^{10}\)
"We are at a stage where we are NOT interested in debates like flat earth and earth sphere. Flat Earth is not a hypothesis, let alone a system of beliefs, it is a verifiable and confirmable fact that people from around the world have known for thousands of years, but indoctrination and censorship of the last 500 years have caused that this once obvious knowledge is today marginalized, manipulated and ridiculed. The materials collected and experiments undertaken unequivocally confirm that the earth is stationary."¹¹

Conclusions
"The new generation of Internet filters looks at the things you seem to like — the actual things you’ve done, or the things people like you like — and tries to extrapolate. They are prediction engines, constantly creating and refining a theory of who you are and what you’ll do and want next. Together, these engines create a unique universe of information for each of us — what I’ve come to call a filter bubble — which fundamentally alters the way we encounter ideas and information"\(^{14}\)
